Summary

As an AI data specialist, I focus on how training data shapes the behavior of large language models and conversational AI systems. **I work with large-scale text and speech datasets to design, curate, and evaluate data** that improves model interaction quality and performance. My work often involves:

- Designing and curating datasets for LLM and conversational AI training
- Running experiments on data mixtures and dataset quality to improve model performance
- Analyzing conversational and language data to identify patterns that influence model performance
- Building and evaluating datasets that support more natural human-AI interaction

I am based in London and am eligible to work *without* the need for visa sponsorship.

Education

Sungkyunkwan University

M.Sc. IN ARTIFICIAL INTELLIGENCE

Suwon, S.Korea

Sep. 2023 - Feb. 2026

- Focus: Natural Language Processing, Interface and Interaction, Communication Theory
- Thesis Topic: An LLM with Human-like Conversational Behaviors

Sungkyunkwan University

B.A. IN EASTERN CULTURAL STUDIES

Seoul, S.Korea

Mar. 2016 - Aug. 2023

- Focus: Digital Humanities, Sociology, Natural Language Processing
- Thesis Topic: Identifying the Limitations of Text Mining Techniques Through a Comparison of Text Analysis Methods

Experience

Channel Corporation

MACHINE LEARNING ENGINEER INTERN

Seoul, S.Korea

Mar. 2025 - Sep. 2025

- Channel Corporation is a customer service platform company that deploys AI agents for chat and phone-based customer support.
- I built automated pipelines for large-scale Korean speech data collection and preprocessing for TTS and conversational turn detection tasks.
- I developed and evaluated a Smart Turn Detection model and constructed benchmark datasets for systematic model evaluation.

Human Language Intelligence Lab

RESEARCHER

Suwon, S.Korea

June. 2021 - Mar. 2025

- I built multilingual and domain-specific datasets for NLP research from web-crawled corpora.
- I collected and curated large-scale Korean text datasets from web sources, including K-pop fandom content and historical archives such as the Annals of the Joseon Dynasty.
- I designed and managed crowdsourcing annotation workflows for language data and implemented quality evaluation procedures to ensure dataset reliability.
- I constructed and analyzed conversational datasets by combining human-human dialogue corpora with AI instruction-tuning data to study overlap, turn-taking, and interaction patterns in human-LLM communication.

Association of University Student Journalists in Seoul

JOURNALIST REPRESENTATIVE

Seoul, S.Korea

2021

- I represented Seoul-based university press organizations and led inter-university collaboration as President of a student journalist association.
- I initiated and negotiated joint political interviews with major parties during the Seoul mayoral election, enabling coordinated multi-outlet reporting.
- I designed interview agendas and secured National Assembly members as interviewees to address youth-related political issues from multiple perspectives.

Honors & Awards

2025 **Outstanding Paper Award**, Workshop on Social Influence in Conversations, ACL

Vienna, Austria

2021 **Best Paper Award**, Software Congress

Seoul, S.Korea

Publications

CONFERENCE PROCEEDINGS

No Verifiable Reward for Prosody: Toward Preference-Guided Prosody Learning in TTS

SEUNGYOUN SHIN, DONGHA AHN, **JiWoo KIM**, SUNGWOOK JEON

2026 IEEE International Conference on Acoustics, Speech, and Signal Processing (ICASSP), Barcelona

Text Overlap: An LLM with Human-like Conversational Behaviors

JiWoo KIM, MINSUK CHANG, JINYEONG BAK

Workshop on Social Influence in Conversations, 2025 Annual Meeting of the Association for Computational Linguistics (ACL), Vienna

KpopMT: Translation Dataset with Terminology for Kpop Fandom

JiWoo KIM, YUNSU KIM, JINYEONG BAK

Workshop on Technologies for Machine Translation of Low-Resource Languages, 2024 Annual Meeting of the Association for Computational Linguistics (ACL), Bangkok

Korean Standard Industry Classification Multilingual Classification Using Data Augmentation

CHANKYUN WOO, JIEUN OH, JEONGYUN HWANG, JAEHYEON PARK, **JiWoo KIM**, JINYEONG PAK
