Summary

As an NLP × HCI researcher, I study how humans communicate with AI, focusing on **making interactions more natural by integrating linguistic and non-verbal signals**, such as pauses, interruptions, and speaking rate.

I recently completed my Master's degree, researching how turn-taking and conversational overlap influence the naturalness of human-LLM interactions. Building on this work, I interned as a Machine Learning Engineer, exploring real-time voice-based AI interactions.

I am experienced across the full research cycle and enjoy iterating this process to generate actionable findings.

I am currently based in Germany and will relocate to London in April 2026, **with full UK work authorization**.

Education

Sungkyunkwan University

M.Sc. IN ARTIFICIAL INTELLIGENCE

Suwon, S.Korea

Sep. 2023 - Feb. 2026

- Focus: Natural Language Processing, Human-AI Interaction, Interface and Interaction, Communication Theory
- Thesis Topic: An LLM with Human-like Conversational Behaviors

Sungkyunkwan University

B.A. IN EASTERN CULTURAL STUDIES

Seoul, S.Korea

Mar. 2016 - Aug. 2023

- Focus: Digital Humanities, Sociology, Natural Language Processing
- Thesis Topic: Identifying the Limitations of Text Mining Techniques Through a Comparison of Text Analysis Methods

Experience

Channel Corporation

MACHINE LEARNING ENGINEER INTERN

Seoul, South Korea

Mar. 2025 - Sep. 2025

- Company deploying AI agents for chat- and phone-based customer support.
- Addressed data scarcity in Korean speech tasks by building automated pipelines for large-scale data collection and preprocessing, enabling robust TTS and conversational modeling.
- Developed a multimodal turn-detection model and built benchmark datasets to enable systematic evaluation of real-time conversational interaction, publishing findings at ICASSP 2026.

Human Language Intelligence Lab

RESEARCHER

Suwon, South Korea

June 2021 - Mar. 2025

- Studied human-LLM communication by framing turn-taking as a core problem, building real-time conversational datasets and interfaces, developing a dialogue model, and publishing findings at *SICoN Workshop (ACL 2025)*.
- Studied multilingual communication in K-pop communities by identifying MT challenges from fan interactions, constructing the KpopMT benchmark dataset, developing a machine translation model, and publishing findings at *LoresMT Workshop (ACL 2024)*.
- Studied historical communication by analyzing premodern texts, collecting and digitizing the Annals of the Joseon Dynasty, applying AI-based text analysis models, and publishing findings at KSC 2021.

Association of University Student Journalists in Seoul

JOURNALIST REPRESENTATIVE

Seoul, South Korea

2021

- Represented Seoul-based university press organizations and led inter-university collaboration as president of a student journalist association.
- Initiated and negotiated joint political interviews with major parties during the Seoul mayoral election, enabling coordinated multi-outlet reporting.
- Designed interview agendas and secured National Assembly members as interviewees to address youth-related political issues from multiple perspectives.

Honors & Awards

2025 **Outstanding Paper Award**, Workshop on Social Influence in Conversations, ACL

Vienna, Austria

2021 **Best Paper Award**, Software Congress

Seoul, S.Korea

Publications

CONFERENCE PROCEEDINGS

No Verifiable Reward for Prosody: Toward Preference-Guided Prosody Learning in TTS

SEUNGYOUN SHIN, DONGHA AHN, **Jiwoo Kim**, SUNGWOOK JEON

2026 IEEE International Conference on Acoustics, Speech, and Signal Processing (ICASSP), Barcelona

Text Overlap: An LLM with Human-like Conversational Behaviors

Jiwoo Kim, MINSUK CHANG, JINYEONG BAK

Workshop on Social Influence in Conversations, 2025 Annual Meeting of the Association for Computational Linguistics (ACL), Vienna

KpopMT: Translation Dataset with Terminology for Kpop Fandom

Jiwoo Kim, YUNSU KIM, JINYEONG BAK

Workshop on Technologies for Machine Translation of Low-Resource Languages, 2024 Annual Meeting of the Association for Computational Linguistics (ACL), Bangkok

Korean Standard Industry Classification Multilingual Classification Using Data Augmentation
